PRODUCT DESIGN PORTFOLIO

Myat Htoo Khaing

Product Designer who ships in code

9+ years · Bangkok, GMT+7 · Open to remote, contract & freelance

myathtookhine.github.io/portfolio-of-mhk

PROFILE

A product designer who ships in code

For 9+ years I've turned complex business needs — restaurant POS, logistics, ticketing — into clear, responsive products, from Figma all the way to production-ready UI.

- FOCUS
  Enterprise, POS, logistics
- PLATFORMS
  Web, tablet, iOS & Android
- STACK
  Figma + React / Tailwind
- LANGUAGES
  English (professional), Burmese (native)

9+ Years of experience

4 Platforms: web, tablet, iOS, Android

10+ Restaurants running Axtra POS

WHAT I BRING

Four things I am hired for

Complex flows, made simple

Restaurant POS, delivery logistics, ticketing and museum management turned into clear, usable screens.

Responsive to the last pixel

Web, desktop, tablet and phone. On Axtra POS I checked and fixed the whole product, directly in the code.

Design that ships in code

Expert CSS, plus React, TypeScript and Tailwind. At OMS I built the design system inside the codebase.

AI-accelerated prototyping

AI as a prototyping partner: a full app redesign in two weeks, accepted by the client.

01

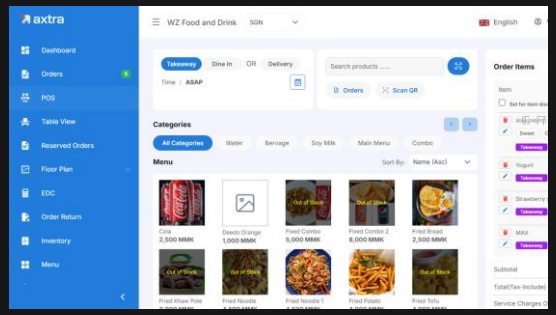

Selected work

Two case studies, and the projects around them

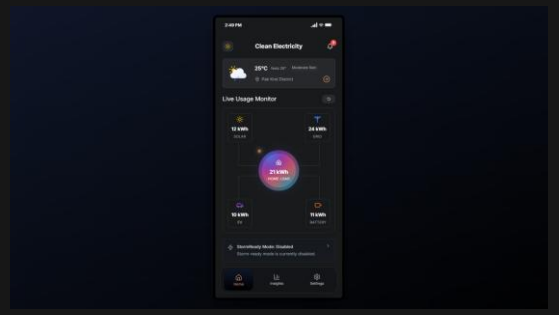

INVENTORY

Nine years of work, at a glance

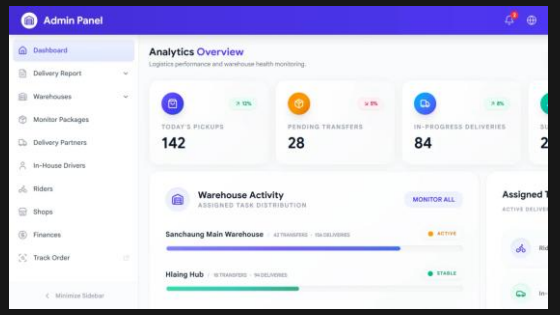

Axtra POS

Point of sale · Restaurants

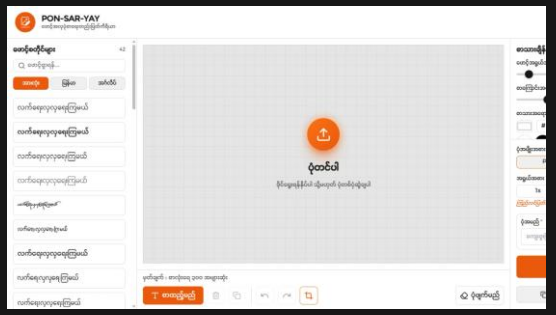

Smart Energy

Client · AI-assisted redesign

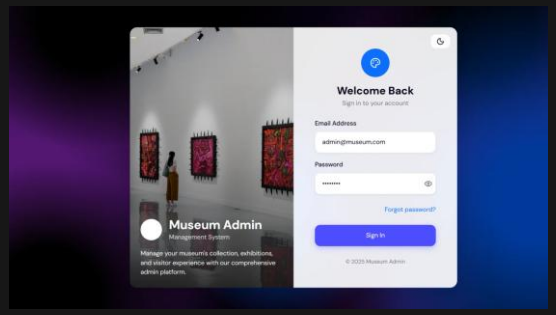

Delivery & Warehouse

Logistics · Enterprise

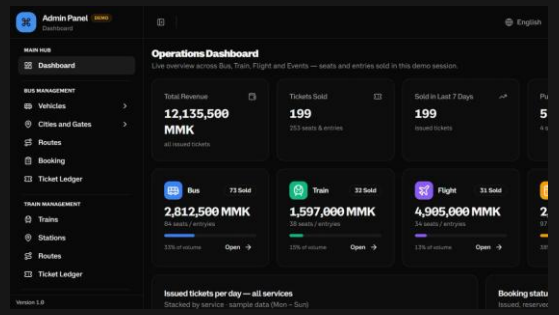

PonSarYay

Open source · Web app

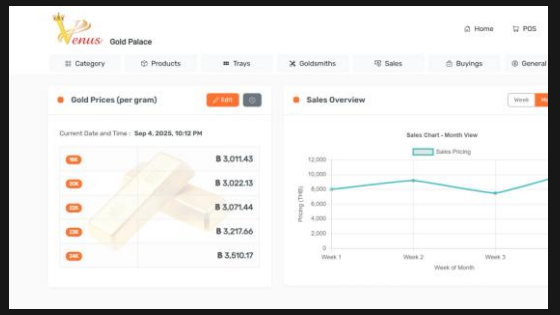

Museum Management

Culture · Admin & visitor app

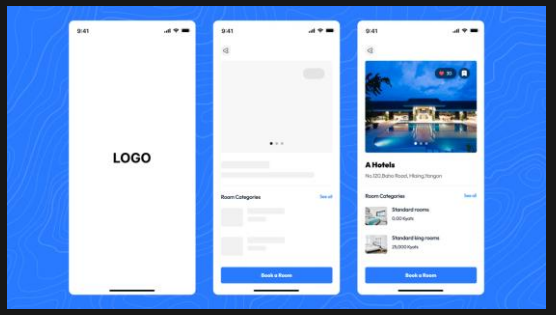

E-ticket Management

Ticketing · Admin console

Gold Shop Management

Retail · Dashboard

Hotel Booking

Customer & owner platform

CASE STUDY 01 · POINT OF SALE

Axtra POS

A cross-platform POS for restaurants: one product that had to work on web, desktop, tablet and phone. The hard part was responsive design across a product that kept growing for over a year.

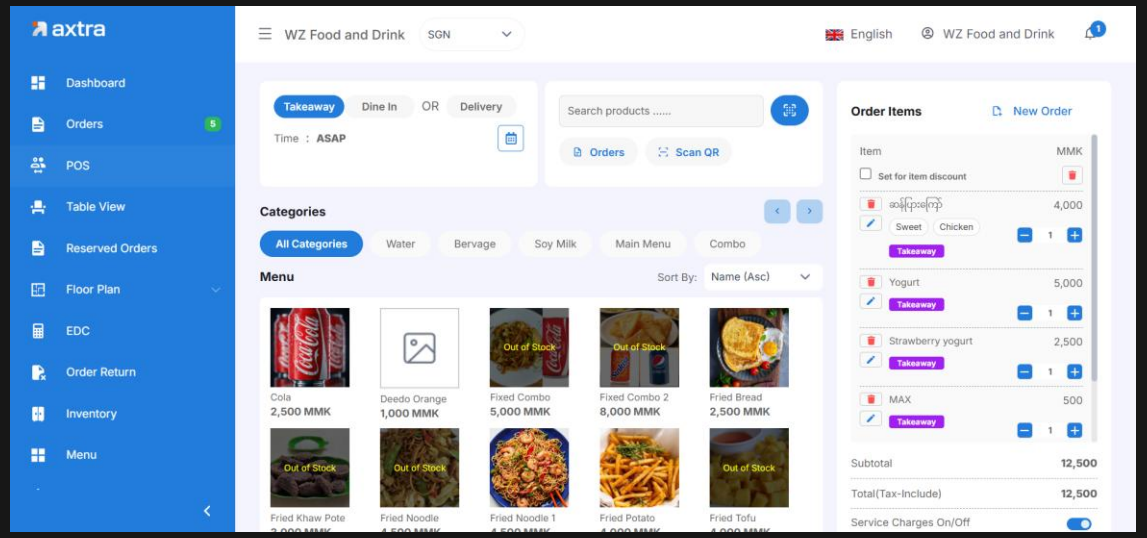

ROLE	Lead Designer & Frontend Dev
TEAM	PO, PM, developers, operations
DURATION	1+ year, start to finish

OUTCOME

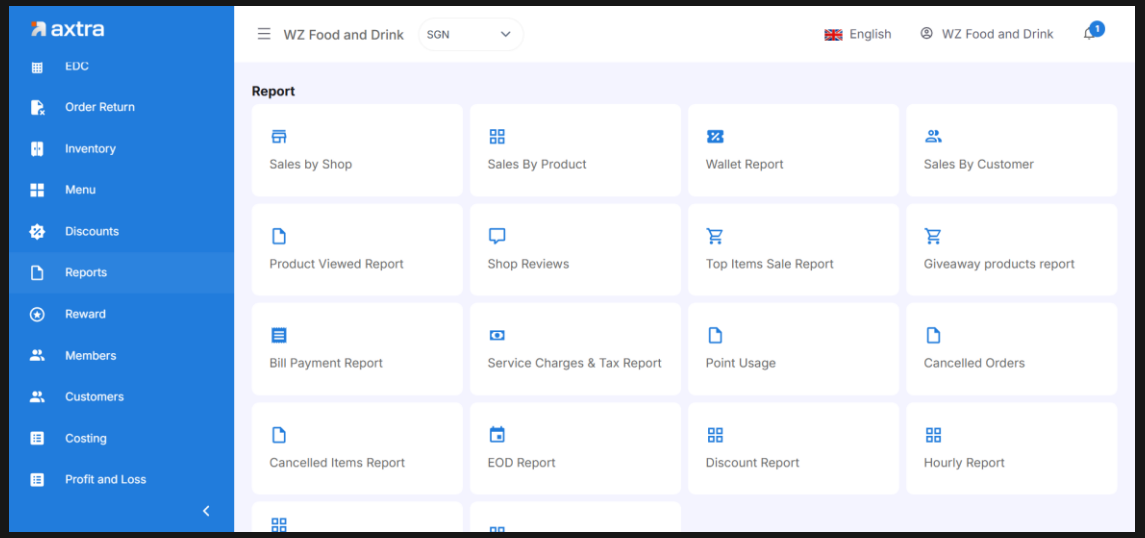

- In use at 10+ restaurants in Yangon
- One consistent product across four screen sizes
- Layouts fixed in the codebase, not in specs

The same product on every screen

Order screen, built for speed at the counter

Reports: the day’s numbers at a glance

CASE STUDY 02 · AI-ASSISTED REDESIGN

Smart Energy Management

A full redesign of a home energy app bringing solar, grid, battery and EV charging into one place. A PRD covered the core; the rest I designed myself — in a two-week window.

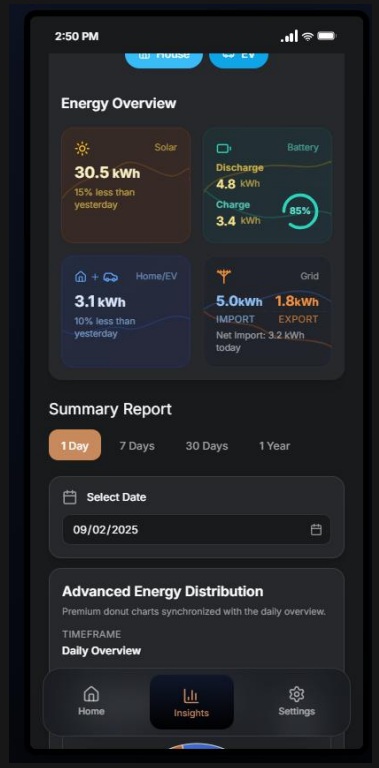

ROLE	Product Designer & Frontend
TEAM	Solo, direct with the client
DURATION	2 weeks

OUTCOME

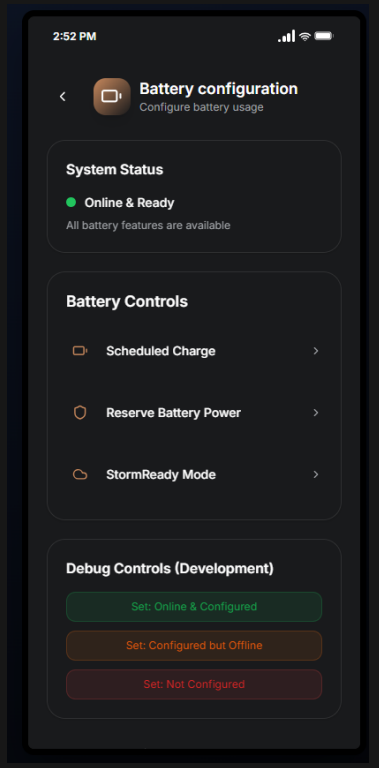

- Whole app redesigned in two weeks
- Design accepted by the client
- Interactive prototype live online

Flows the brief left open

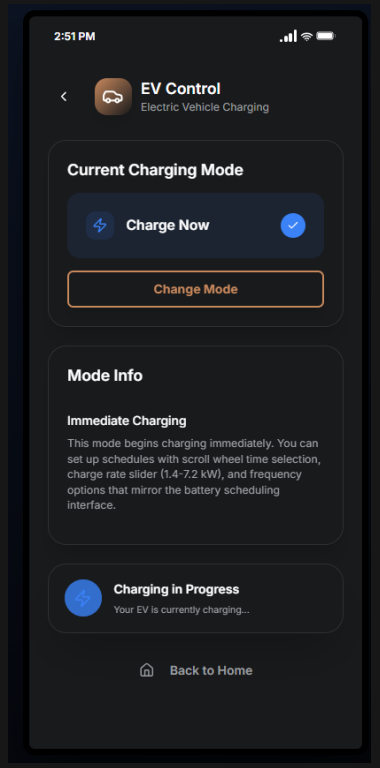

Insights

Usage by day, week, month, year

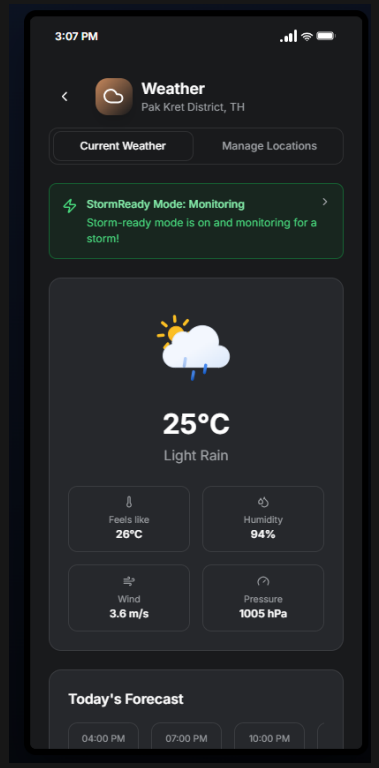

Battery

System status and controls

EV charging

Current mode at a glance

Weather

StormReady monitoring

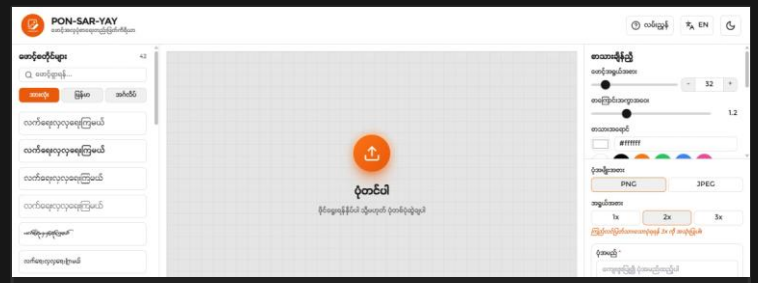

ALSO IN THE INVENTORY

Six more products

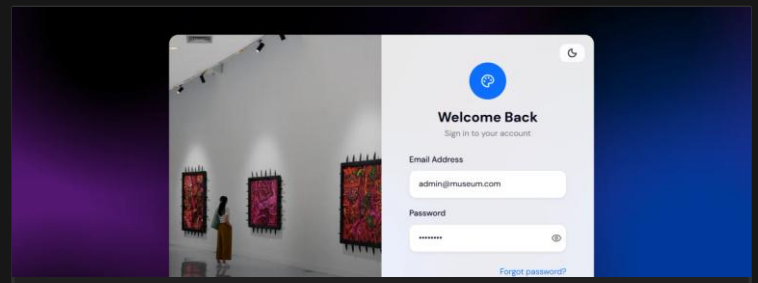

Delivery & Warehouse

Warehouses, partners, drivers and riders in one admin panel — prototyped as working React apps.

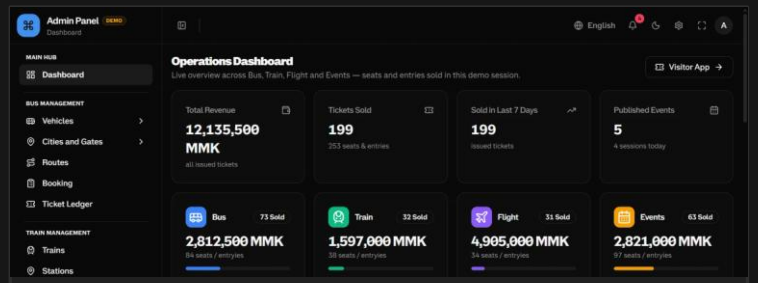

PonSarYay

My open-source text-on-image editor with Burmese fonts, refined using GA4 insights.

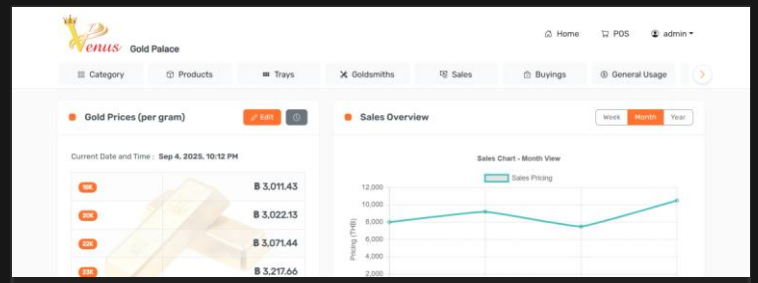

Museum Management

Collection and exhibitions, plus a visitor app that reads artifact stories aloud.

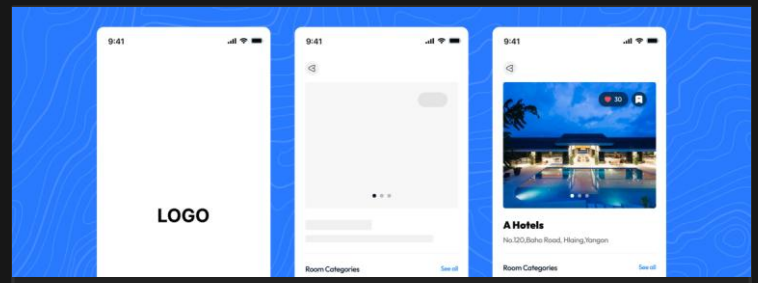

E-ticket Management

Bus, train, flight and event ticketing run from a single operations console.

Gold Shop Management

Daily gold price board by purity, sales overviews and a built-in POS.

Hotel Booking

Booking for travellers, with room, pricing and availability tools for owners.

PROCESS

How the work actually gets done

1

Learn the operation

Talk to the people who use the product every day, not only the product team.

2

Design with engineering

Sit beside the developers while features are built, instead of handing work over a wall.

3

Build in the product

Refine the UI in the codebase with CSS, so fixes ship as working screens.

4

Prototype at AI speed

Turn a brief into screens a client can click, in days rather than weeks.

5

Test every screen

Web, desktop, tablet and phone, until the layout holds up on all of them.

02

Background

Where the nine years went, and what I work with

EXPERIENCE

Nine years, four chapters

2025 — Present

Self-employed

Freelance Product Designer

Museum, gold shop and e-ticket systems, plus PonSarYay, my own open-source editor.

2023 — 2025

Online Merchant Solutions

Lead Designer & Frontend Dev

Axtra POS across web, tablet and mobile; React prototypes for logistics.

2019 — 2023

Online Merchant Solutions

Senior UI/UX Designer

Rider app, booking and guest systems; built the design system and UI kit.

2016 — 2019

Narigo Travel and Tour

Web & Graphic Designer

Responsive pages from scratch, plus logos, icons and vector illustration.

TOOLKIT

What I work with

DESIGN & PROTOTYPING

UI/UX design · Wireframing · High-fidelity prototyping · Design systems · Design engineering · Vector illustration · Logo & icon design

FRONTEND

CSS/SCSS (expert) · HTML · JavaScript · TypeScript · React · Next.js · React Native · Vue · Svelte · Angular · Vite · Tailwind · Bootstrap

TOOLS

Figma · Adobe Illustrator · Adobe XD · Framer · Lottie Lab · Gemini · Antigravity · Claude Code · ChatGPT · Git · GitHub · GitLab

PLATFORMS & DEPLOYMENT

Vercel · GitHub Pages · Cloudflare · Supabase · Render · Resend

Education · BA in English, Pakokku University · Google UX Design Professional Certificate (in progress) · Foundations of UX Design, Coursera

GET IN TOUCH

Let’s work together
